PROFESSIONAL SUMMARY

Fresh AI/DS graduate (CGPA 8.0) with hands-on experience building agentic AI pipelines, real-time computer vision systems, and LLM-powered backends. Skilled in LangChain, Flask, YOLO, and Docker. Seeking a full-stack developer role to build intelligent autonomous applications.

TECHNICAL SKILLS

Agentic AI	LangChain, Prompt Engineering, LLM Tool-Use, Autonomous Pipelines, Decision Logic, Chain-of-Thought Design
AI / ML	Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, YOLO, TensorFlow, PyTorch, Hugging Face
Backend	Python, Flask, REST APIs, Docker, Git
Data	SQL (Joins, Aggregations), OpenCV, Data Pipelines

PROJECTS

AI-Based Intrusion Detection System | Python · Flask · YOLO · OpenCV · Docker · LLM Integration | 2025

- Built an **agentic surveillance pipeline** using YOLO on live video; autonomous alert-triggering with zero human intervention
- Engineered a **Flask REST API** integrating OpenCV video capture with YOLO inference — full-stack AI-to-application integration
- Added an **LLM-based reasoning layer** for context-aware alert prioritization, reducing false positives by ~20%
- Containerized with **Docker** for reproducible, deployment-ready packaging

SECS++ Rubik's Cube Solver | Python · Heuristic Optimization · Multi-Step Reasoning | 2025

- Built a **heuristic solver with phased strategies** and custom cost functions — multi-step planning logic analogous to LLM agent reasoning
- Demonstrated **complex problem decomposition** into sequential decision steps, a transferable skill for agentic workflow design

EDUCATION & CERTIFICATIONS

B.Tech – AI & Data Science (Hons.)

Hindusthan Institute of Technology, Coimbatore |
CGPA: 8.0 | April 2026

Geospatial Data Analysis

Dept. of Space, Govt. of India | NCC
Cadet Sergeant 2022–2025
